## The Search for TC and the Hot Spots

written & illustrated by Michelle & Abi Buckley

This is RAi-Ted (radioactive iodine Ted). He is no ordinary teddy. His mission is to rid the human body of the Evil TC and his nasty band of Hot Spots.

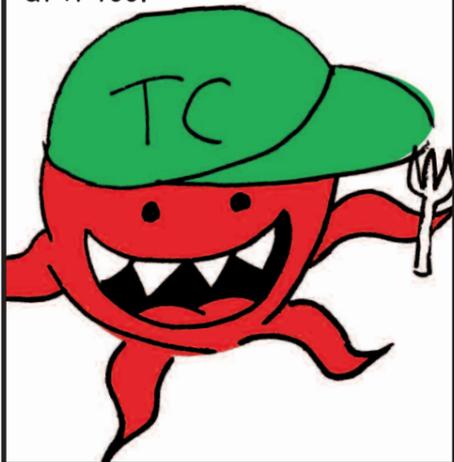

Quick! Load up the capsule car.  
We need to follow the map.

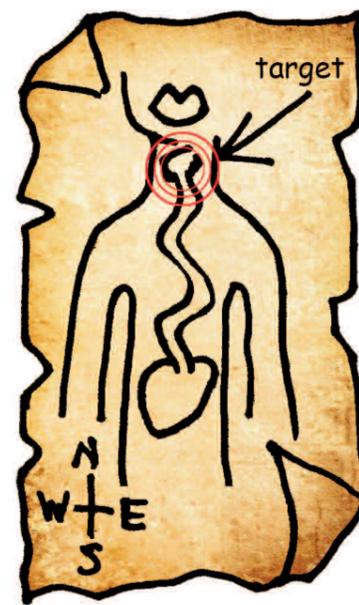

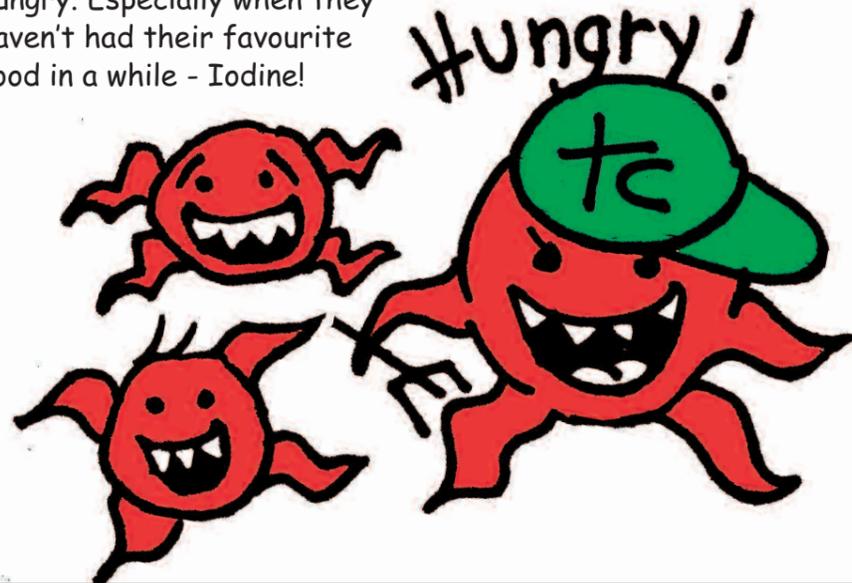

First into the mouth cave and down to the tummy. From there we go North via the blood stream to TC's hideout in the neck, looking out for any of his hot spots hiding anywhere on the way (they especially like the lungs). He won't be able to resist our box of goodies!

This is the naughty TC (thyroid cancer). He loves to play hide and seek with the doctors. He can be very good at it too.

TC and his Hot Spots are always hungry. Especially when they haven't had their favourite food in a while - Iodine!

TC and the Hot Spots are soo hungry they eat it all up in one go...  
gobble, munch, crunch ...

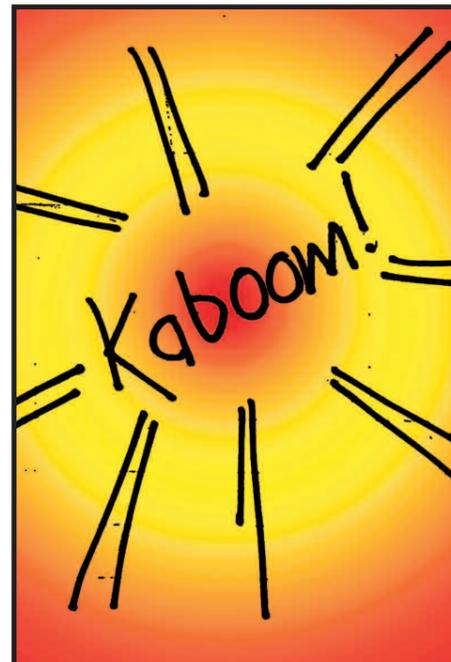

First RAi-Ted must find TC using his super strong scanner. There is nowhere he can hide!

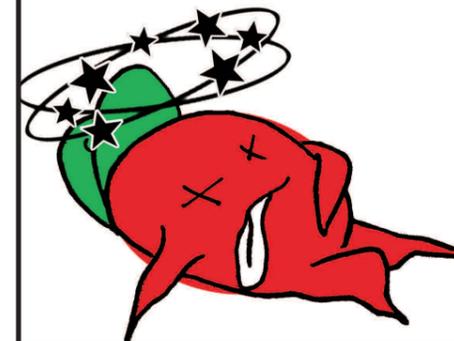

We got you now TC!

RAi-Ted has a little surprise for TC and his naughty gang of hungry Hot Spots!

Think that's the end of TC and his lot!

Another good job by RAi-Ted.
